

Atty's Docket: 101215-117

**CLAIM AMENDMENTS**

9. (Currently amended) A process for microbial leaching of a sulfidic material, the process comprises the steps of:

a) preparing an aqueous leaching fluid consisting of

at least one sulfur-containing amino acid selected from the group consisting of cysteine, methionine, homocysteine, ~~and~~ and/or amides and esters, thereof, and optionally a buffer ~~one or more salts~~;

~~optionally, bacteria of the genus *Thiobacillus*,~~

b) contacting said fluid with the sulfidic material for a length of time sufficient to achieve leaching,

wherein bacteria of the genus *Thiobacillus* are either a component of the aqueous leaching fluid of step (a) or, the bacteria are added to a discharging fluid, wherein said discharging fluid comprises the aqueous leaching fluid resulting from the performance of step (b).

10. (Previously presented) The process of claim 9 wherein the leaching fluid includes the bacteria.

12. (Previously presented) The process of claim 9 wherein the bacteria are added to the discharging fluid.

13. (Currently amended) The process of claim 9 wherein, the total concentration of the at least one sulfur-containing amino acid ~~or amide or ester derivatives thereof~~, is equal to or less than  $8 \times 10^{-3}$  M.

Atty's Docket: 101215-117

14. (Previously presented) The process of claim 9 wherein the pH of the leaching fluid is between 1 and 4.
15. (Previously presented) The process of claim 14, wherein the pH of the leaching fluid is between 1.5 to 2.
16. (Previously presented) The process of claim 9, wherein the bacteria are *Thiobacillus ferrooxidans*.
19. (Currently amended) The process of claim 9, wherein the at least one sulfur-containing amino acid is an amide, an ester, or mixture thereof: aqueous leaching fluid consists of a mixture of sulfur-containing amino acids or their amides and esters, the sulfur-containing amino acids being selected from the group consisting of cysteine, methionine, homocysteine, and/or amides and esters thereof, and optionally a buffer.
20. (Canceled)
21. (Currently amended) A process for microbial leaching of a sulfidic material, wherein the process comprises the steps of:
- a) preparing an aqueous leaching fluid consisting of
    - at least one sulfur-containing amino acid selected from the group consisting of cysteine, methionine, homocysteine, ~~and~~ and/or amides and esters, thereof,
    - bacteria of the genus *Thiobacillus*, ~~and optionally one or more salts;~~ and
  - b) contacting said aqueous leaching fluid with the sulfidic material for a period of time sufficient to achieve leaching.
22. (New) The process of claim 9, wherein the leaching fluid consists of at least one amide or ester of a sulfur containing amino acid selected from the group of methionine, cysteine, and homocysteine, and optionally, a buffer.
23. (New) The process of claim 21, wherein the total concentration of the at least one sulfur-containing amino acid or the amid or ester ther of, is equal to or less than  $8 \times 10^{-3} \text{M}$ .

Atty's Docket: 101215-117

24. (New) The process of claim 21, wherein the leaching fluid consists of at least one amide or ester of a sulfur containing amino acid selected from the group of methionine, cysteine, and homocysteine.

Atty's Docket: 101215-117

New matter

The claims have been amended to delete the allegedly offending terms, and instead recite the optional inclusion of a buffer. This is disclosed on page 3 in the context of adjusting the pH.

Enablement

Claim 19 has been amended to conform with Examiner's suggested language, and is believed to address Examiner's concern.

Indefiniteness

The language rendering addition of the bacteria as optional is deleted.

However, the body of the claim recites two different points in the process at which the bacteria may participate in the process.

It is respectfully suggested that the amended claim is not indefinite.

Claim 13 has been amended in accordance with Examiner's suggestion.

Claim 20 has been deleted.

CONCLUSION

It is believed in good faith that all of the issues raised by the Examiner have been properly addressed by the foregoing amendments.

Accordingly, allowance of the claims is requested.

Respectfully Submitted,
